

Vivek Srivastava

B.Tech Computer Science (AI & ML)

+91-9506689123 | srivastavavivek2005@gmail.com | LinkedIn | GitHub | LeetCode

Summary

Analytical, detail-oriented Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning, with hands-on experience building ML models, computer vision systems, and LLM/RAG applications using Python, TensorFlow, LangChain, and FastAPI. Strong foundation in data structures, algorithms, and full-stack deployment, with a proven ability to translate raw data into actionable, data-driven solutions.

Education

Vellore Institute of Technology, Bhopal

Sep 2023 – Present

Bachelor of Technology in Computer Science and Engineering (AI & ML)

CGPA: 9.12/10

Central Hindu Boy's School, Varanasi

Apr 2021 – Mar 2022

Higher Secondary Education (Class XII)

Percentage: 78.60%

St. Xavier's School

Apr 2019 – Mar 2020

Secondary Education (Class X)

Percentage: 95.33%

Technical Skills

Languages: Python, Java, C++, JavaScript

Web/Backend: React.js, Node.js, Express.js, Flask, MongoDB, MySQL, REST APIs

AI/ML: Scikit-learn, TensorFlow, PyTorch, NumPy, Pandas, Seaborn

Tools/Platforms: Git, Linux, Docker, Google Cloud, AWS, VS Code, MS Excel, PowerBI

Projects

DevScope AI – GitHub Profile Analyzer & Career Readiness Predictor

- Built a tool that takes a GitHub username and returns a data-driven "hireability" breakdown using a trained ML model, rather than just displaying raw GitHub stats.
- Engineered features from commit history, repo activity, language diversity, and contribution patterns to train a predictive readiness-scoring model.
- Implemented data collection via the GitHub REST API and built the scoring pipeline using Python, Scikit-learn, and Pandas with a Flask-based interface.

Multi-Modal Chatbot Platform

- Built a Retrieval-Augmented Generation (RAG) pipeline using LangChain, FastEmbed, and DocArray for document Q&A, SQL queries, and web search.
- Integrated OpenAI and Ollama LLMs with memory management for context-aware, multi-turn conversations.
- Designed a modular Streamlit interface supporting six AI modules with real-time streaming responses and improved response accuracy through prompt engineering.

Breast Cancer Detection Using Machine Learning

- Achieved 96% classification accuracy using Random Forest with Grid Search hyperparameter tuning on 500+ patient records.
- Built an end-to-end ML pipeline using Scikit-learn, Pandas, and NumPy, covering feature engineering, preprocessing, and model evaluation.
- Compared multiple classification algorithms (Logistic Regression, SVM, Random Forest) and validated results using cross-validation and confusion matrix analysis.

Leadership & Activities

AI Club, VIT Bhopal – Technical Team Member

Jan 2024 – Present

- Led and contributed to multiple AI/ML projects while collaborating with cross-functional student teams.
- Organized technical workshops on AI and Machine Learning for 150+ students and mentored junior members.

National Service Scheme (NSS), VIT Bhopal – Volunteer Head

Aug 2024 – Present

- Coordinated awareness campaigns and community service initiatives benefiting over 500 participants.
- Participated in environmental and social welfare activities promoting community engagement.

Achievements

- Finalist, Neural Nexus Hackathon (2024); State Round Qualifier, RBI@90 Quiz (2024).
- Solved 300+ Data Structures and Algorithms problems on LeetCode; completed 100 Days of Coding challenge.
- Participated in multiple national-level hackathons focused on AI and software development.

Certifications

- GenAI using IBM Watsonx – IBM (Jun 2025)
- Complete Generative AI with LangChain & Hugging Face – Udemy (2025)
- Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp – Udemy (2025)
